

MOA PARSLAND

User Experience Designer

+61420 450 035 | moaparsland@gmail.com
www.moaparsland.com | in/moaparsland

Over the last year I have been working as a UX/Graphic Designer for a startup company called iPug Pty Ltd. on the Sunshine Coast of Australia. The position has involved overall responsibility for UX/UI design and user customisation for the company's various mobile and web applications as well as web and graphic design. In my portfolio moaparsland.com you will find some of the more recent projects I have had the pleasure to work on.

Skills

To whom it may concern,

I am writing to you regarding Moa Parsland of Ombla Design.

For the past twelve months Moa worked for iPug in both UX/UI and Graphic Design roles. Moa was a fantastic addition to our small but effective team. Moa always had enthusiasm for her work and always made sure her thinking and design thought process were understood by all. Moa is competent and organized and works most efficiently when there is clear design goals, outcomes and expectation mapped out in advance.

I believe that Moa, either in a role as an employee or contracting as her own design company (Ombla) has a tremendous amount of potential and would be an outstanding addition to your company or project. If you have any further questions or would like to speak with me personally, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "L. R. Holzheimer".

LETTER OF RECOMMENDATION

Volvo Car Corporation

2017-05-12

Moa has been working as a project leader for certain components within Volvo car corporation. She has been fully responsible for time, technique, cost and has been leading a team involving persons from styling, R&D, different attribute areas, manufacturing, geometry, purchasing, quality as well as different suppliers. During the work she has been a quick learner and has shown great skills as project leader within a complex area and an ability to get things done. Within a short period of time she has built up a broad network and has been a highly appreciated co-worker.

I can highly recommend her and would not hesitate to hire her myself if I get the opportunity.

Kind Regards

Witold Hansson

To whom it may concern,

This is to certify that Moa Parsland was employed [with remuneration] by Semcon to conduct her master thesis in Industrial Design Engineering, from September 1st 2015 to March 15th 2016.

In the MERCO project [Mediated Effective Remote Collaboration], Moa identified user needs and requirements, defined, designed and built interactive prototypes and tested them in an iterative design process. The goal was to improve remote collaboration in a corporate context. Moa collaborated and communicated independently with different users and project stakeholders to achieve this goal.

We are grateful for her excellent contributions in the project.

David Gillblom

Senior UX Lead
Project manager for the MERCO project
